Vishwash Soni

Software Development Engineer | React.js | JavaScript | MERN Stack

+91-8299494873 | vishwashsoni348@gmail.com | **Portfolio** | **LinkedIn** | **GitHub** | **LeetCode**

Professional Summary

Results-driven Software Development Engineer (B.Tech CSE, 2026) with a strong foundation in **Data Structures & Algorithms** (**950+ LeetCode problems solved, 365-day streak**) and hands-on experience building, optimizing, and deploying scalable **React.js** and **JavaScript (ES6+)** applications integrated with **RESTful APIs** and AI services. Shipped **10+ web applications** and built a full-stack **MERN** project (MongoDB, Express.js, React, Node.js) featuring secure authentication and cloud image uploads; strong in responsive design, component-based architecture, and modern web development.

Technical Skills

Languages: JavaScript (ES6+), C++, SQL, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Vite, React Router, React Hook Form, Context API, Responsive Web Design, REST API Integration
Backend (Learning): Node.js, Express.js, RESTful APIs, JWT Authentication, bcrypt, Multer
Databases: MongoDB (Mongoose), MySQL
AI & APIs: Groq AI API, Gemini AI API, LLM Integration, Cloudinary
Tools & Platforms: Git, GitHub, Vercel, Render, Netlify, VS Code
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Coding Profiles & Achievements

- **LeetCode:** Solved 950+ problems across Arrays, Trees, Graphs, and Dynamic Programming; maintained a 365-day streak
- **NeetCode 150:** Completed all 150 core DSA problems covering every major pattern tested in technical interviews
- **HackerRank Certified:** JavaScript (ES6+) | React.js
- Shipped **10+ production-ready** React and JavaScript web applications deployed on Vercel and Netlify

Projects

AI Portfolio Assistant | ***React, Node.js, Express.js, Groq SDK, Tailwind CSS*** **Live** | **GitHub**

- Developed a full-stack conversational AI chatbot using **React** and **Express.js**, integrating the **Groq SDK** to deliver LLM responses in under 2 seconds, enabling recruiters to query skills, projects, and background in real time.
- Scoped chatbot behavior via a custom system prompt, reducing off-topic responses and keeping all answers within portfolio context across all 3 key sections (skills, projects, experience).
- Deployed a **CORS-protected** Express.js backend on **Render** and a **Tailwind CSS** responsive frontend on **Vercel**, making the assistant fully accessible on both desktop and mobile.

ReachAI — AI Cold Email Generator | ***React, Vite, Tailwind CSS, Supabase, Groq AI API*** **Live** | **GitHub**

- Built an AI-powered cold email tool using **React (Vite)** and **Groq AI API** that generates job-specific outreach emails from a job description and resume input, cutting manual drafting time from 15–20 minutes to under 30 seconds.
- Integrated **Supabase** to persist generated emails per user session, allowing retrieval of previously created emails without re-generating — reducing redundant API calls.
- Built a fully responsive **Tailwind CSS** UI tested across 4+ screen sizes, ensuring a consistent experience on desktop, tablet, and mobile.

NexContact — Full-Stack Contact Manager | ***MERN Stack, JWT, Cloudinary*** **Live** | **GitHub**

- Engineered a full-stack **MERN** contact manager with complete **CRUD** and name search, where every contact is scoped to its owner and enforced through protected routes on both the React frontend and Express API.
- Implemented secure authentication using **JWT in HTTP-only cookies** with **bcrypt** password hashing, plus **email OTP verification** at signup (2-minute expiry, resend limits and lockout) delivered via the Brevo email API.
- Integrated **Cloudinary** and **Multer** for profile image uploads (5 MB, image-only), built validated forms with **React Hook Form**, and deployed the frontend on **Vercel** and the backend on **Render** with **MongoDB Atlas**.

Portfolio Website | ***React.js, Tailwind CSS, EmailJS*** **Live** | **GitHub**

- Designed and deployed a responsive personal portfolio using **React.js** and **Tailwind CSS**, applying lazy loading and code splitting to achieve a Lighthouse performance score above 90 and sub-2-second initial load time.
- Integrated **EmailJS** for serverless contact form submissions, enabling direct email delivery without a backend; structured the site into dedicated sections for projects, skills, and contact to improve recruiter navigation.

Education

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.9/10 **Jun 2022 – Jun 2026**
Ashoka Institute of Technology and Management *Varanasi, Uttar Pradesh*
